

PI 592796. *Hordeum vulgare* L. ssp. *vulgare*

Cultivar. Pureline. "AC ALBRIGHT"; PGR27230; BT670; 3703. CV-263. Pedigree - Otrá/6/(Weibull 1514-64)Morgenrot/5/Tammi/4/Maja/3/Opal//Hanna/Svanhals. Released 1993. Early hulled spring 6-row feed barley. Resembling Otal in most traits but about 9.4% higher yielding and 2 days later maturing. Head nodding. Lemma awns rough with green tip. Glume awns long, purplish tip. Aleurone yellow. Rachilla hairs short. Some lateral kernel overlap. Basal marking incomplete horseshoe depression. Susceptible to common diseases of barley in northwestern Canada, *Rhynchosporium secalis*, *Pyrenophora teres*, *Ustilago* spp., *Helminthosporium gramineum*, and common root rot (*Cochliobolus sativus* and *Fusarium*). Registered in Canada 1993.

PI 592797. *Hordeum vulgare* L. ssp. *vulgare*

Cultivar. Pureline. "AC STACEY"; PGR26729; 3172; NRGB84-8; BT664; BT663. CV-264. Pedigree - Otal/Melvin. Released 1989. Hulled early maturing spring 6-row feed barley. Head nodding. Lemma and glume awns rough with green tip. Glume awns short. Aleurone yellow. Rachilla hairs short. Height fairly short. Some lateral kernel overlap. Many lemma veins purple. Basal marking a horseshoe depression. Excellent resistance to *Rhynchosporium secalis*. Resistant to *Pyrenophora teres* Wpg857, susc. to 102 & 858. Susceptible to *Ustilago hordei* and *U. nigra*, and highly susceptible to *U. nuda*. Susceptible to *Helminthosporium gramineum*, common root rot (*Cochliobolus sativus* and *Fusarium* spp.) and to *Puccinia graminis*. Registered in Canada 1989.

PI 592798. *Hordeum vulgare* L. ssp. *vulgare*

Cultivar. Pureline. "JACKSON"; BT657; PGR27231; CN17839; Bv.56918-10; NRGB78-6; 2463. CV-265. Pedigree - Fjola/Husky (H64-35,BT607)/Pomo. Released 1985. Hulled, early maturing, spring, 6-row feed barley. Head fairly long and dense, curved near base. Aleurone yellow to pale blue. Rachilla hairs short. Lateral lemma veins barbed. Lemma awn long, rough, tip green. Lemma and palea finely wrinkled. Glume covered with long hairs, awn 4-5 times glume. Rachis edges tapered, hairy. Basal marking of kernel transverse crease. Test weight good. High yield for time of release. Susceptible to common barley diseases in northwestern Canada, particularly *Rhynchosporium secalis*. Susceptible to neck break. Registered in Canada 1985.
